PROFILE SUMMARY

Computer Science graduate with hands-on experience in Solidity smart contract development and Ethereum testnet deployments using Remix and MetaMask, including contract verification on Etherscan.

TECHNICAL SKILLS

Blockchain & Smart Contracts

- Solidity (Intermediate)
- Smart Contract Development
- Ethereum and Ethereum Virtual Machine (EVM)
- Blockchain Fundamentals

Token Standards

- ERC-20 (Fungible Tokens)
- ERC-721 (NFTs)
- ERC-1155 (multi-token standard)

Web3 Development

- Web3.js (wallet connection, read/write transactions)
- Frontend ↔ Smart Contract integration
- Ethereum Ecosystem
- Remix IDE (writing, deployment)
- MetaMask
- Ethereum Sepolia Testnet
- Etherscan contract verification & interaction

Developer Tools & IDEs

- Visual Studio Code (VS Code)

Version Control

- GitHub
-

SOFT SKILLS

Dedicated | Decision Making | Smart Worker | Problem-Solving | Quick Learner | Risk Handling | Enthusiastic

BLOCKCHAIN PROJECTS

Decentralized Voting Smart Contract

Solidity | Ethereum Sepolia | Remix | MetaMask

- Admin can add/manage candidates
- Each wallet can cast only one vote
- Uses events for efficient tracking
- Auto-calculates winner on-chain
- Built using Remix + MetaMask, verified on Etherscan

 *Live Contract:*

Wallet-Based To-Do List Smart Contract

Solidity | Ethereum Sepolia | Remix | MetaMask

- Wallet-specific on-chain task manager
- Add, update, delete tasks securely
- Transparent and immutable storage
- Built using Remix + MetaMask, verified on Etherscan

 *Live Contract:*
